👤 INTRODUCTION

Full-Stack Software Engineer and Mobile Developer with a strong foundation in building modern web and mobile applications. Passionate about backend architecture and delivering seamless user experiences using **React.js**, **TypeScript**, **Next.js**, **React Native**, **Spring Boot**, and **Express.js**.

Skilled in working with **PostgreSQL**, **MongoDB**, and REST APIs, with experience developing responsive frontends, robust backends, and scalable database solutions. Known for strong problem-solving abilities, clean code practices, and a continuous learning mindset.

🧠 SKILLS

Programming Languages

JavaScript / TypeScript, Java, PHP, C, C++(Data Structures & Algorithms)

Frontend Development

React.js, Next.js, HTML5 / CSS3, Tailwind CSS, Responsive / Mobile-Friendly UI Design

Backend Development

Spring Boot, Express.js, REST APIs, JWT Authentication, Next.js

DATABASES

PostgreSQL, MongoDB, MySQL, SQLite, Supabase, Neon

Cloud & Tools

Cloudinary, Git & GitHub, Linux / Bash, Postman, CI/CD

📁 PROJECTS

04/2026 – Present

DevTrack - Full-Stack Developer

Developer Productivity & Analytics Platform

- Technologies: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Recharts
- Built a full-stack productivity platform for tracking projects, tasks, GitHub activity, and coding analytics.
- Implemented authentication, protected routes, and Kanban task management using Supabase.
- Integrated GitHub activity tracking via Edge Functions and built analytics dashboards for productivity insights.

- Deployed on Vercel with a Supabase backend.

04/2026 – 05/2026

RecipeFlow

Recipe Platform - Full-Stack Developer

- Technologies: React.js, Spring Boot, MySQL, Cloudinary
- Built a full-stack recipe sharing app with CRUD operations and user interactions.
- Integrated Cloudinary for image upload and media management.
- Developed REST APIs and responsive UI for mobile and desktop users.

01/2026 – 03/2026

Livora

Real Estate Platform - Full-Stack Developer

- Technologies: React Native (Expo), TypeScript, Express.js, PostgreSQL, JWT, TypeORM
- Developed a cross-platform real estate app for property listings, messaging, and user management.
- Built a mobile-first frontend using React Native with Expo Router (iOS, Android, Web).
- Designed and integrated REST APIs with secure JWT authentication and PostgreSQL database.
- Implemented core features including favorites, messaging, and user profiles.

11/2025 – 01/2026

Mula

Expense Tracking Application - Full-Stack Developer

Technologies: React Native (Expo), Node.js, Express.js, PostgreSQL, Clerk, Upstash Redis

- Built a full-stack expense tracking app with mobile (Expo) and backend (Express.js) architecture.
- Implemented secure authentication using Clerk with user session management.
- Developed real-time transaction handling with PostgreSQL (Neon) database integration.
- Added API rate limiting using Upstash Redis for performance and abuse protection.
- Supported iOS, Android, and Web deployment through Expo.

11/2021 – 02/2022

Smart Poultry App

Mobile Developer

- Technologies: React Native (Expo), Node.js, Express.js, MongoDB, Socket.io, JWT
- Developed mobile UI for a poultry management system tracking farm operations and growth data.
- Integrated REST APIs for authentication, batch management, and task workflows.
- Implemented real-time updates using Socket.io and OAuth-based login flows.

PROFESSIONAL EXPERIENCE

09/2024 – Present
Nyabihu, Rwanda

Software Engineering Projects (Full-Stack & Mobile Development)

Academic Experience

- Developed multiple full-stack applications using React.js, React Native, Node.js, Express.js, and Spring Boot.
- Built and integrated RESTful APIs with frontend applications, handling authentication, data flow, and user interactions.
- Worked with both SQL (PostgreSQL, MySQL) and NoSQL (MongoDB) databases for structured and flexible data storage.
- Implemented authentication systems using JWT, OAuth, and third-party services (Clerk, Supabase Auth).
- Developed mobile applications using React Native with Expo, supporting Android, iOS, and web platforms.
- Used Git and GitHub for version control and collaboration workflows.
- Debugged backend and frontend issues, improving performance, reliability, and user experience.

- Applied software engineering practices, including testing, modular design, and clean code principles.

10/2025 – Present
Nyabihu, Rwanda

Hackathon Experience

RCA Hackathon

Role: Backend Developer

Technologies: Express.js, Node.js, REST APIs

- Participated in the RCA Hackathon as a Backend Developer, contributing to rapid full-stack solution development under time constraints.
- Designed and implemented RESTful APIs using Express.js for core application functionality.
- Collaborated with frontend and team members to ensure smooth API integration and data flow.
- Focused on backend architecture, request handling, and endpoint reliability during development.
- Worked under tight deadlines, demonstrating problem-solving and teamwork in a fast-paced environment.

 EDUCATION

09/2024 – Present
Nyabihu, Rwanda

Software Engineering and Embedded Systems

Rwanda Coding Academy

Relevant Coursework:

- Software Development Lifecycle
- Data Structures & Algorithms
- Web development using JavaScript and MongoDB
- Web development using PHP
- Java OOP
- Advanced Java (Spring Boot)
- Introduction to Database(MySQL)
- Advanced Database(PostgreSQL)

 LANGUAGES

English

Kinyarwanda

 INTERESTS

Full-Stack Development

Building complete web applications from frontend interfaces to backend systems and APIs.

Mobile Development

Developing cross-platform apps using React Native with focus on performance and usability.

Backend Systems & APIs

Designing scalable REST APIs, authentication systems, and database-driven applications.

Data Structures & Algorithms(C++)

Strengthening problem-solving skills and algorithmic thinking for efficient software design.
