👤 INTRODUCTION

Full-Stack Software Engineer specializing in building scalable SaaS applications, API-driven platforms, and mobile-first systems using React, Next.js, Node.js, and Spring Boot.

Experienced in designing complete backend architectures including authentication systems, REST APIs, dashboards, and database-driven applications. Strong ability to integrate third-party services, build secure user systems, and deploy production-ready applications.

Passionate about building AI-powered tools, automation systems, and full-stack products optimized for user engagement and scalable deployment.

🧠 SKILLS

Mobile

- React Native (Expo)

Backend & APIs

- Node.js, Express.js, Spring Boot, PHP
- REST APIs, JWT Authentication
- Multi-user SaaS architecture

Cloud & Dev Tools

- Git/GitHub, Linux, Postman
- Vercel, Cloudinary, Upstash Redis, Render, Netlify
- CI/CD basics, API integrations

Frontend & SaaS UI

- React.js, Next.js, TypeScript
- Tailwind CSS, Responsive UI Design
- Dashboard & Admin Panel Development

DATABASES

- PostgreSQL, MongoDB, MySQL, SQLite
- Neon, Supabase

📁 PROJECTS

04/2026 – Present

DevTrack —

SaaS Developer Analytics Platform

Next.js | TypeScript | Supabase | PostgreSQL | Tailwind

- Built a **full-stack SaaS platform** for developer productivity analytics
- Implemented **authentication system, protected routes, and user sessions**
- Designed **Kanban task system and admin dashboard**

- Integrated GitHub activity tracking using serverless functions
- Built analytics dashboards for behavioral and productivity insights
- Deployed production-ready SaaS on Vercel with Supabase backend

04/2026 – 05/2026

RecipeFlow —

Full-Stack Content Platform

React.js / Spring Boot / MySQL / Cloudinary

- Built a **content-driven platform with CRUD and media handling**
- Developed REST APIs for user and content management
- Integrated image storage and media processing via Cloudinary
- Designed responsive frontend for multi-device usage

01/2026 – 03/2026

Livora —

Multi-Platform Real Estate SaaS

- Technologies: React Native (Expo), TypeScript, Express.js, PostgreSQL, JWT, TypeORM
- Developed a cross-platform real estate app for property listings, messaging, and user management.
- Built a mobile-first frontend using React Native with Expo Router (iOS, Android, Web).
- Designed and integrated REST APIs with secure JWT authentication and PostgreSQL database.
- Implemented core features including favorites, messaging, and user profiles.

11/2025 – 02/2026

Smart Poultry —

Poultry Management App

React Native / Node.js / MongoDB / Socket.io [↗](#)

- Built a real-time data-tracking **mobile system**
- Implemented live updates using WebSockets (Socket.io [↗](#))
- Developed backend APIs for farm management workflows

11/2025 – 01/2026

Mula —

Fintech-Style SaaS Expense Tracker

Technologies: React Native (Expo), Node.js, Express.js, PostgreSQL, Clerk, Upstash Redis

- Built a full-stack expense tracking app with mobile (Expo) and backend (Express.js) architecture.
- Implemented secure authentication using Clerk with user session management.
- Developed real-time transaction handling with PostgreSQL (Neon) database integration.
- Added API rate limiting using Upstash Redis for performance and abuse protection.
- Supported iOS, Android, and Web deployment through Expo.

PROFESSIONAL EXPERIENCE

09/2024 – Present
Nyabihu, Rwanda

Full-Stack Developer (Academic & Independent SaaS Projects)

Rwanda Coding Academy

Rwanda Coding Academy | 2024 – Present

- Built multiple **SaaS-style full-stack applications with authentication, dashboards, and APIs**
- Designed RESTful backend systems with Node.js, Express.js, and Spring Boot
- Implemented secure authentication systems (JWT, OAuth, Clerk, Supabase Auth)
- Worked with SQL and NoSQL databases in production-style environments
- Integrated third-party APIs for cloud storage, authentication, and analytics
- Deployed scalable applications using Vercel and cloud service

10/2025 – Present
Nyabihu, Rwanda

RCA Hackathon

Rwanda Coding Academy

- Built REST APIs under strict time constraints
- Focused on backend architecture and endpoint reliability

- Collaborated with frontend teams for full-stack integration

EDUCATION

09/2024 – Present
Nyabihu, Rwanda

Software Engineering and Embedded Systems

Rwanda Coding Academy

Relevant Coursework:

- Software Development Lifecycle
- Data Structures & Algorithms
- Web development using JavaScript and MongoDB
- Web development using PHP
- Java OOP
- Advanced Java (Spring Boot)
- Introduction to Database(MySQL)
- Advanced Database(PostgreSQL)
- Advanced Networking

LANGUAGES

English

Kinyarwanda

INTERESTS

Full-Stack Development

Building complete web applications from frontend interfaces to backend systems and APIs.

Mobile Development

Developing cross-platform apps using React Native with focus on performance and usability.

Backend Systems & APIs

Designing scalable REST APIs, authentication systems, and database-driven applications.

Data Structures &

Algorithms(C++)

Strengthening problem-solving skills and algorithmic thinking for efficient software design.
